

```
1 #include <stdio.h>
2
3 int main()
4 {
5     double a, b, product;
6     printf("Enter two numbers: ");
7     scanf("%lf %lf", &a, &b); // Corrected format specifier from %f to
        %lf for double
8     product = a * b;          // Fixed missing '='
9     printf("Product = %f", product);
10    return 0;
11 }
```

Enter two numbers: 1.2 3

Product = 3.600000
